[Adam Faulk Tanksley Foundation, Inc.](#)

Who we are:

- Adam Faulk Tanksley Foundation, Inc. is a 501(C) 3, non-profit corporation established solely to make a difference in the lives of children and their families affected by pediatric cancer.
- Adam Faulk Tanksley Foundation is a founding member of Carolina Kids Cancer Research Coalition and authorized partner of Levine Children’s Hospital.
- The Foundation is named for Adam Faulk Tanksley, who was diagnosed at age 3 in 2008 with Stage IV Anaplastic Wilms’ Tumor, a rare childhood kidney cancer with a 20% chance for survival. After multiple surgeries, more than 120 rounds of chemotherapy, and 18 days of radiation at Levine Children’s Hospital, Adam is in 1st grade and his cancer is in remission.

What we do:

- By raising funds and bringing awareness, through fun and uplifting events, our mission is to help find a cure for pediatric cancer.
- Our foundation has pledged to raise \$500,000 to help fund the Developmental Therapeutics Program at Levine Children’s Hospital. This amount is being matched by the Levine Foundation and will total \$1 Million once we reach our goal.
- The Developmental Therapeutics Program (DVL) provides cutting edge research for phase I and phase II clinical trials in pediatric cancer – providing new and advanced treatments for pediatric cancer patients in Charlotte and the greater southeast region.

Why it matters:

- Kids who relapse or are diagnosed with pediatric cancer will not be forced to travel far away from home, family and their support networks to obtain the latest technologies in cancer treatment.
- What sets Levine Children’s Hospital DVL program apart is the combination of excellent medical treatment coupled with family-centered care. This is in addition to fact that it’s the only facility in the southeast providing these types of treatments.

Together we can CHOMP CHILDHOOD CANCER!!
